SUMMARY

JavaScript developer with a computer engineering degree and a year building an AI-powered SaaS platform from the ground up. Strong across the full stack: React and TypeScript on the frontend, Node.js and PostgreSQL on the backend, with hands-on experience integrating large language models into a live product used by client organizations.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React, Vite, Tailwind CSS, responsive interfaces, interactive dashboards, single-page applications

Backend: Node.js, Express, PostgreSQL, REST APIs, multi-tenant architecture, database design

AI: large language model (LLM) integration, prompt engineering, real-time AI chat, AI-powered analytics

Tools: Docker, Jenkins, CI/CD, Git, GitHub, Agile

EXPERIENCE

JavaScript Developer | 99rabbits 2025 to 2026

AI-powered SaaS platform that helps organizations measure and improve workplace culture through AI-guided employee conversations and analytics.

- **Frontend:** developed the platform's full React and TypeScript frontend, including an interactive drag-and-drop interface for administrators to configure and connect AI assistants without code.
- **Real-time AI:** built the real-time AI chat experience, streaming responses from a large language model for fast, fluid conversations.
- **Backend:** designed and built the Node.js and PostgreSQL backend powering the entire product, from user accounts and surveys to analytics and reporting.
- **Security & scale:** implemented secure authentication and strict data isolation across a multi-tenant architecture, keeping each client organization's data private and access fully under control.
- **Analytics:** created the engine that converts employee conversations into structured, scored insights on team culture and morale for company leaders.
- **Delivery:** owned delivery end to end, containerizing the application with Docker, automating builds and deployments through CI/CD, and integrating Microsoft Teams, scheduled surveys, and usage tracking.

EDUCATION

BSc, Computer Engineering

Instituto Politécnico de Tomar (IPT), Portugal
